# CAR PROTECTION SYSTEMS

# TURTLE STANDARD SYSTEM (ROPE VARIANT)

- The round arch enables a continuous emptying. (No hail gets stuck in the net)
- 360° protection against hail.
- Modular system with variable arch diameters (5,0 m / 5,5 m / 6,0 m)
- Variable distance between arches (maximum 6,0 m)
- System height 3,2 m
- Entrance height 2,0 m
- Anchor distance 2,0 m
- Anchor depth 2,0 m
- Certified until hail class 4:
  - Hail diameter: 40 mm
  - Mass: 29,2 g
  - Speed: 99 km/h
- Additional options: driveway with hail net (no opening or closing of the entrances) After the hail hits the net, it rolls into the middle and empties into the driveway.

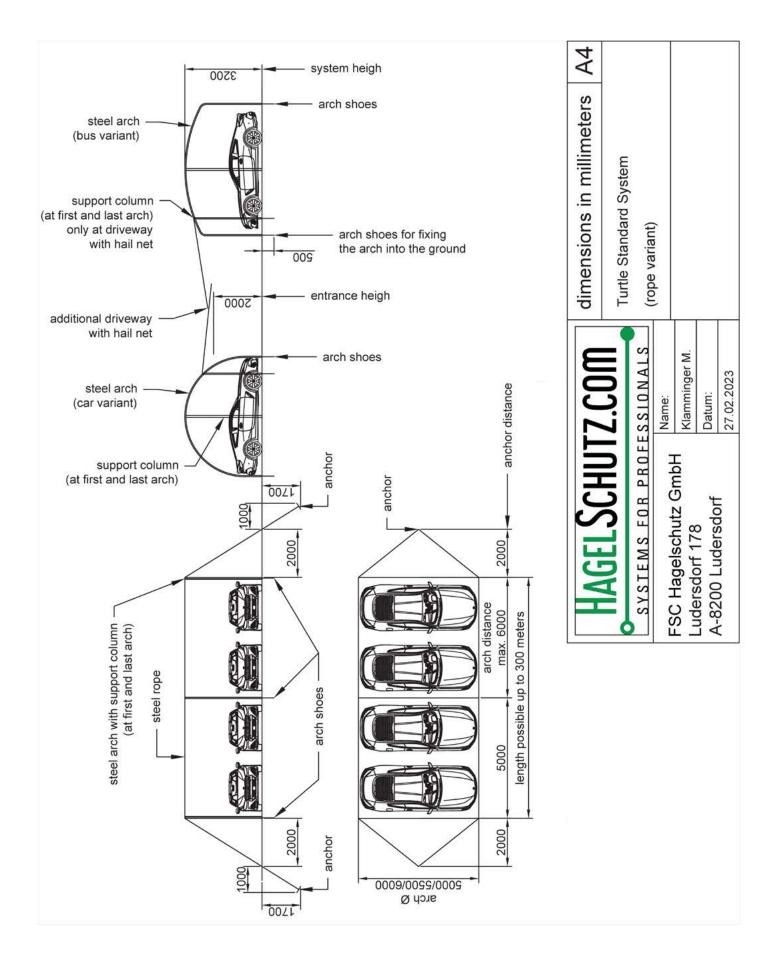

# TURTLE STANDARD SYSTEM (ROPE VARIANT)

# TURTLE STANDARD SYSTEM (TUBE VARIANT)

- The round arch enables a continuous emptying. (No hail gets stuck in the net)
- 360° protection against hail.
- Modular system with variable arch diameters (5,0 m / 5,5 m / 6,0 m)
- Variable distance between arches (maximum 6,0 m)
- System height 3,2 m
- Entrance height 2,0 m
- Anchor distance 0,8 m
- Anchor depth 0,5 m
- Certified until hail class 4:
  - Hail diameter: 40 mm
  - Mass: 29,2 g
  - Speed: 99 km/h
- Additional options: driveway with hail net (no opening or closing of the entrances) After the hail hits the net, it rolls into the middle and empties into the driveway.

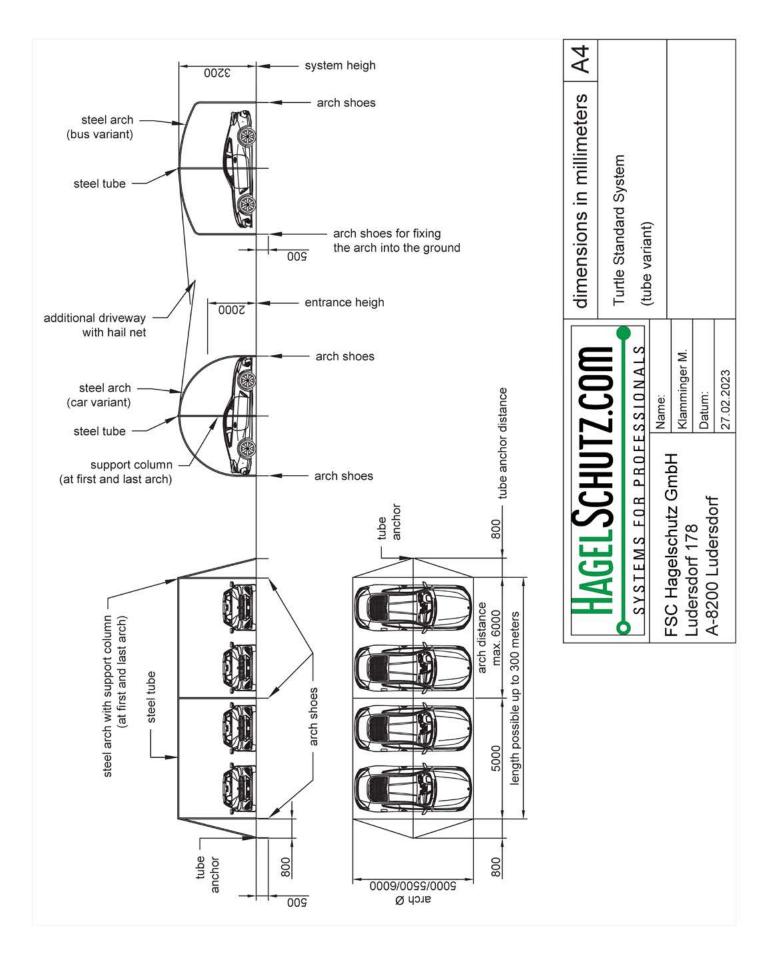

# TURTLE STANDARD SYSTEM (TUBE VARIANT)

## **TURTLE TRANSPORTER SYSTEM**

- The round arch enables a continuous emptying. (No hail gets stuck in the net)
- 360° protection against hail.
- Modular system with variable arch diameters (6,0 m / 6,5 m / 7,0 m)
- Variable distance between arches (maximum 6,0 m)
- System height 4,5 m
- Entrance height 3,0 m
- Anchor distance 2,5 m
- Anchor depth 2,0 m
- Certified until hail class 4:
  - Hail diameter: 40 mm
  - Mass: 29,2 g
  - Speed: 99 km/h
- Additional options: driveway with hail net (no opening or closing of the entrances) After the hail hits the net, it rolls into the middle and empties into the driveway.
- Hail net elevator: The entrance can be opened with a hand crank.

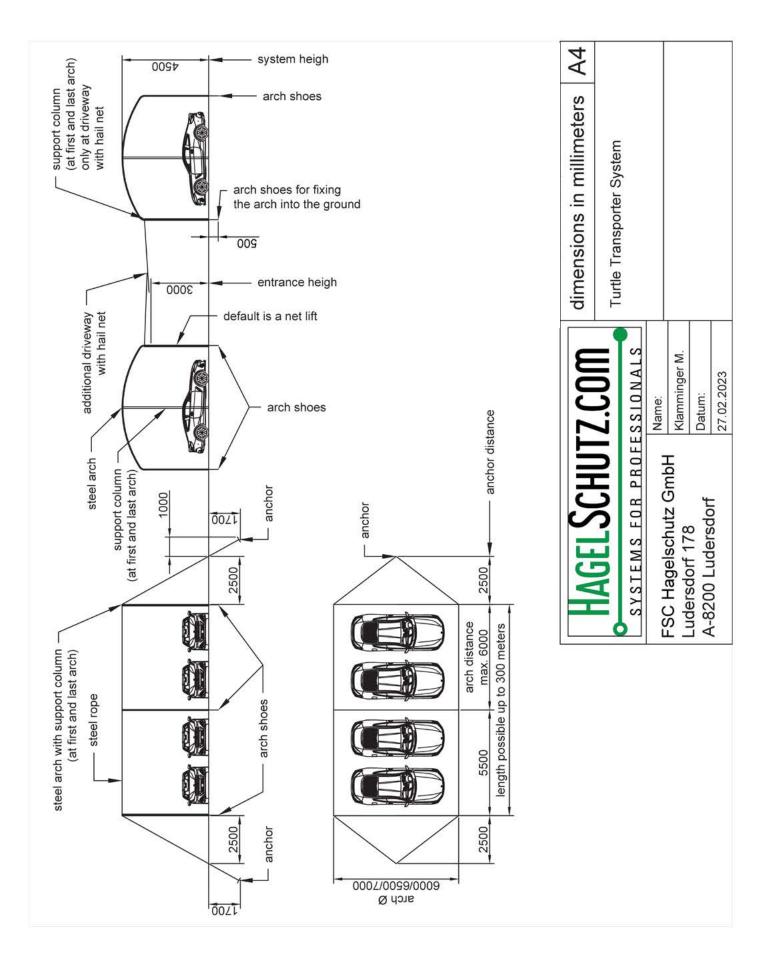

### **TURTLE TRANSPORTER SYSTEM**

### **TURTLE CARAVAN SYSTEM**

- The round arch enables a continuous emptying. (No hail gets stuck in the net)
- 360° protection against hail.
- Modular system with variable arch diameters (7,0 m / 7,5 m / 8,0 m)
- Variable distance between arches (maximum 6,5 m)
- System height 5,0 m
- Entrance height 3,5 m
- Anchor distance 3,0 m
- Anchor depth 2,0 m
- Support column at each arch
- Certified until hail class 4:
  - Hail diameter: 40 mm
  - Mass: 29,2 g
  - Speed: 99 km/h
- Additional options: driveway with hail net (no opening or closing of the entrances) After the hail hits the net, it rolls into the middle and empties into the driveway.
- Hail net elevator: The entrance can be opened with a hand crank.

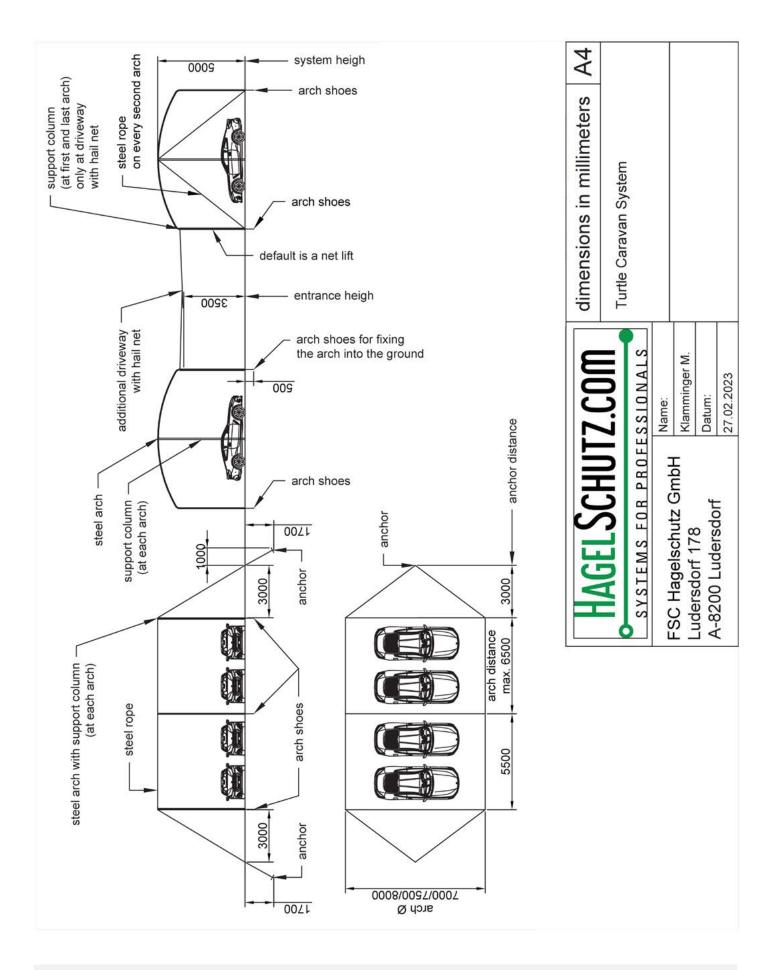

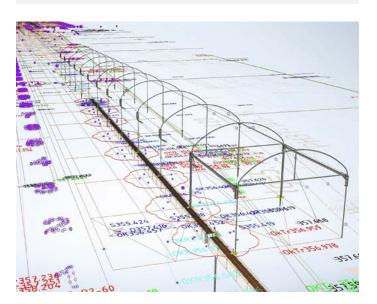

### **TURTLE CARAVAN SYSTEM**

# TURTLE SPECIAL SYSTEM (STRAIGHT PARKING)

- The round arch enables a continuous emptying. (No hail gets stuck in the net)
- 360° protection against hail.
- Easy opening and closing due to stirrup system.
- Modular system with variable arch diameters (5,0 m / 5,5 m / 6,0 m)
- Variable distance between arches (maximum 6,0 m)
- System height 4,5 m
- Entrance height 3,0 m
- Certified until hail class 4:
  - Hail diameter: 40 mm
    - Mass: 29,2 g
    - Speed: 99 km/h

# **SAFETY PROTECTION**

#### **Collision Protection for Arch**

- Material: Mash PVC-leather, UV certified, color yellow
- Inner diameter 5 cm, outer diameter 8 cm, height 150 cm

#### **Collision Protection for Column**

- Material: Mash PVC-leather, UV certified, color yellow
- Inner diameter 10 cm, outer diameter 12,5 cm, height 150 cm

#### **Tipping Cylinder**

- Material: polyethylene, color yellow/black
- Diameter 10 cm, height 100 cm
